# MISSION

Our mission is to bring real and lasting change to children, youth and young women living in poverty through holistic multidimensional programs in education, economic development and public health.

# WHERE WE WORK

Over 80% of the population where we work are dependent on low level subsistence farming which is mainly for food with no viable source of income and survive on one meal a day. This has accelerated the vicious cycle of poverty and high illiteracy rates because it is nearly impossible for these families to educate their children making it difficult for the residents to get access to services and opportunities.

### — KAYUNG

KAMULI

The villages have very poor and nadequate infrastructure with no proper school in place, limited access to clean water, Electricity, poor sanitation and hvoiene standards.

Over 50% of children do not complete primary school—and the majority of families rely on low level subsistence farming which is mainly for food with no viable source of income.

#### **OUR PROGRAMS**

#### Education

Where we work, children don't have the opportunity to receive an education. Some don't have resources like books or uniforms, leaving children to fall behind without the support to catch up. Youth drop out of school to support their families and never go back. And entire school systems are understaffed, failing to provide adequate education to the children.

#### **Health & Wellness**

Children where we work live without access to basic health necessities such as clean water and sanitation. Health issues often cause children to fall behind in school, and a lack of education leads the way for drug use, early pregnancy and gang affiliation. Our programs develop children, youth & young women's knowledge and capacity to engage in positive behaviors to nurture their well-being, live healthy lives and know their rights.

#### **Child Protection**

We believe every child deserves to be protected from violence, live a full life, and have the chance to grow and learn so that they may reach their full potential. Where we work, we build a safety net of loving people to protect children, prevent harm and ensure that those who are harmed receive the help they need to recover.

#### **OUR PROGRAMS**

#### **Girls' Empowerment**

We create programs that help girls make choices and changes in their lives. Igniting their confidence to act differently at a time that can define their future. So every girl can choose to be in control of her body, her health, her learning and livelihood.

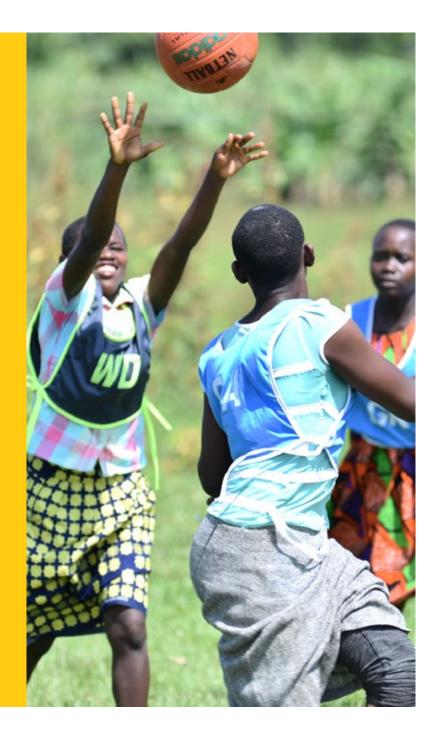

#### Sport for Change

Ba Nga Afayo Initiative Uganda harnesses the power of sport to create positive change in the lives of disadvantaged young people in the rural and marginalized communities where we work. BaNgaAfayo's work helps to make young people and their communities healthier, safer and more successful.

#### **Child & Maternal Health**

No child should die from preventable diseases. We focus not only on the treatment of malnutrition and disease, but also on preventing them from ever occurring in the first place. We believe an investment in health care – especially maternal and child health – is vital to prevent illness and disability in children.

Shafic

Your support is a beacon of hope for children like Shafic, who come from poverty-stricken families. Through our child scholarship program, made possible by your generous contributions, Shafic and others like him are given the opportunity to break free from the cycle of poverty.

Your compassion and generosity provide more than just financial assistance; you are providing a lifeline to education and a pathway to a brighter future. By sponsoring children like Shafic, you are not only changing individual lives but also transforming entire communities.

Thank you for your unwavering commitment to making a difference in the lives of those who need it most. Your kindness and generosity are truly making dreams possible.
